

Conflict Minerals Confirmation

This is to confirm that, to the best of our knowledge, Elementis' products do not contain conflict minerals.

Conflict minerals are defined as columbite-tantalite (coltan) (*contains tantalum*), cassiterite (*contains tin*), gold, wolframite (*contains tungsten*) or their derivatives from the Democratic Republic of the Congo and its adjoining countries – Angola, Burundi, Central African Republic, Republic of the Congo, Rwanda, South Sudan, Tanzania, Uganda and Zambia.

None of these substances are intended ingredients of our products, and based upon information from our raw material suppliers, are not expected to be present in our products except as unknown contaminants at trace levels.

The information provided in this document is correct to the best of ELEMENTIS' knowledge, information and belief at the date of its publication. The information given is designed for guidance purposes only, and is not to be considered a warranty or quality specification. The information relates only to the specific product designated and may not be valid for such product when used in combination with any other material or in any process, unless specified in this document. ELEMENTIS specifically disclaims any liability for any loss, injury or damage which may result from use or misuse of this product.

All chemicals should be handled only by competent personnel, within a controlled environment. It is the buyer's/user's responsibility to ensure that his activities comply with all applicable federal, state, provincial and local laws, and to determine the conditions necessary for the safe use of this product. ELEMENTIS urges each customer or recipient of this document to study it carefully and consult appropriate expertise, as necessary or appropriate, to become aware of and understand the data contained in this document and how it relates to the product.
