

Corporate Quality Policy

Elementis is firmly committed to consistently meeting or exceeding customers' expectations by supplying high quality products and providing excellent services.

We will perpetually review specific needs and requirements of our customers and develop, manufacture and deliver innovative products to fulfill those needs. We will create value for our customers through our expertise, responsiveness and constant focus on quality by continually improving our products, processes and systems.

To fulfill our commitment, all Elementis manufacturing facilities will develop and implement quality management systems and applicable Good Manufacturing Practices (GMPs) conforming to intentional standards or guidelines. Facilities will also establish, periodically review and strive to achieve measurable quality objectives.

Quality is a fundamental responsibility of every employee at Elementis, and all team members will persistently uphold this obligation of quality and continual improvement.

Paul Waterman,
Chief Executive Officer

Arthur Norman,
Sr. Vice President, GSCM
